

# Job opportunities at OPENSchool Solutions

If you believe that **students should be prepared for a volatile and uncertain future** instead of just memorizing formulas and facts, this position is for you!

OPENSchool Solutions develops a browser-based web platform that **enables schools to implement progressive self-learning methods** and to administer real individualization of students' learning.

We do this because we are convinced that **our children are our future**. They should learn how to rethink and reshape current systems to work towards a world worth living in.

The already existing OPENSchool format is designed to teach children exactly that. It is a compilation of best practice learning methods and is already in use in a public middle school in Vienna **since September 2018**. We, the team of OPENSchool Solutions, follow our mission to bring the format to many schools around the world.

Therefore, we are searching for volunteers with experience in the following fields:

- **Web Design:** Help us create user interfaces that appeal to students between 12-15 years or to teachers between 26 and 40 years.
- **Software Development:** If you are familiar with Laravel or PHP, help us code the platform.
- **Internet Security:** We care about the security of our platform and data. Help us keep attackers outside.
- **Testing:** Help us make sure that our platform delivers what it promises with automatic testing or by giving feedback yourself.
- **Others:** While the aforementioned fields are those where we search volunteers, the most important thing we look for is passion about education. If you are really passionate and want to contribute anything other than the mentioned fields, feel free to contact us too.

The position is **voluntary** at the moment.

However, if you stay with us for at least 2 months, we are keen to issue a **certificate of completion** and a letter of recommendation where we assess your skills and enthusiasm. After those 2 months we will also offer you to become a permanent **team member**.

If you agree with that, apply to join our team by filling out this form:

Our team consists of 4 motivated individuals between 20 and 27. If you want to join us, apply through this form: <https://bit.ly/34S1js3>
